

## High Pressure Equipment

### Ultra High Pressure Valves, Fittings and Tubing 100,000 and 150,000 psi service

High Pressure Equipment Company has developed a line of Ultra High Pressure products to assure safe and easy plumbing for 100,000 psi and 150,000 psi. These needle valves, fittings, check valves, tubing and nipples are engineered to the highest standards of repeatable quality. The reliable performance of these products has made HiP one of the world's leading suppliers of elevated pressure components.

Ultra High Pressure components use a coned-and-threaded connection which accommodates the extreme conditions found in these applications. Ultra High Pressure valves are available in  $\frac{1}{4}$ " and  $\frac{3}{8}$ " O.D. tubing sizes and four patterns to satisfy widely varied requirements. A line of fittings is available to facilitate adapting to High Pressure systems.

## High Pressure Equipment

### Ultra High Pressure Valves 100,000 psi service

High Pressure (coned and threaded) type connections for  $\frac{1}{4}$ " O.D. by  $\frac{1}{16}$ " I.D. tubing.

**Non-rotating tip stems** insure long life on valve seats.

Heavy duty "rolled style" stem design is shown below.

**Glands and collars** for tubing are supplied with each valve unless otherwise requested (glands and collars are shown on page 5.A).

**Materials** include 316 stainless steel for valve bodies with tool steel lower section stems. Valve packing is teflon.

**Corresponding fittings** (elbows, tees, crosses, etc.) are shown on page 5.4.

**Replaceable Seat Valves** are available for  $\frac{1}{4}$ " O.D. tubing.

These valves feature the same body style and body dimensions as the two way angle valves (shown below).

To order add "R" to the corresponding two way valve catalog number (eg. 100-12XF4R).

### Fittings/Check Valves

We have developed check valves, elbows, tees and crosses for both the 100,000 and 150,000 psi systems. \*Material is high tensile 316 stainless steel. Standard tubing glands and collars are furnished unless otherwise specified.

\* Note: Material for 150,000 psi check valve is 17-4 PH.

## Ultra High Pressure Tubing

Tubing is cold drawn, seamless, and is supplied in the  $\frac{1}{8}$  hard condition (not annealed). Tensile strength is approximately 40 percent higher than that of annealed tubing. All tubing is manufactured in strict accordance with High Pressure Equipment Company specifications to insure tolerances and bore quality. Tubing is stocked in lengths of 18 to 22 feet but may be ordered in shorter lengths with **no additional cutting charge**.

### Ultra High Pressure Connections

**(Coned and Threaded)  
100,000 and 150,000 psi service**

The Ultra High Pressure tubing connection is available for  $\frac{1}{4}$ " and  $\frac{3}{8}$ " O.D. tubing. The tubing may be prepared with the use of tooling (see tooling section 9.0) or prepared at the factory to specified lengths. Additionally, standard length coned and threaded nipples are available from stock, see page 5.5.

This connection has become an industry standard for use at elevated pressures and temperatures in both liquid and gas applications. It may be disassembled and retightened indefinitely.

The threads of the gland are right-hand while the threads of the collar and tubing are left-hand to prevent rotation of the collar during assembly.

**Materials.** All of the components required for make-up of a Ultra High Pressure connection (glands, collars and plugs) are produced in Type 316 stainless steel.

**Necessary glands and collars** are provided with all valves and fittings (except nipples) unless otherwise requested (see chart on the right for size details and catalog numbers).
